SUBJECT INDEX
VOLUME 5

Adenoviruses
  immunocompromised host, 262
Amebiasis
  diagnosis, 356
  epidemiology, 356
  pathogenicity, pathogenesis, and pathology, 356
  therapy, 356
Antimicrobial agent tests
  bactericidal effects, 420
  clinical relevance, 420
  technical performance, 420
Antiviral therapy
  current concepts, 146
  practices, 146
Aspergillosis
  antigen detection
    letter, 211
Automated systems
  identification of microorganisms, 302

Candida albicans
  high-frequency switching, 183
Capillariasis
  intestinal, 120
Chagas' disease
  acute infection, 400
  cardiomyopathy
    chronic, 400
  gastrointestinal disease
    chronic, 400
  neurological manifestations, 400
Continuous ambulatory peritoneal dialysis
  peritonitis
    microbiological aspects, 36
Cytomegalovirus infection
  immunocompromised patients, 204
  nonpulmonary manifestations, 204

Detection methods
  nucleic acid based
    advances, 370

Echinococcosis
  diagnosis
    immunological, 248
    molecular, 248

Gardnerella vaginalis
  characteristics, 213
  clinical considerations, 213
  controversies, 213
Giardiasis
  clinical features, 93
  diagnosis, 93
  epidemiology, 93
  immunology, 93
  pathology, 93
  treatment, 93

Hepatitis B virus infection
  primary hepatocellular carcinoma, 275
Human immunodeficiency virus type 1
  laboratory methods for early detection
    infants, 238
    newborns, 238
Hypnozoite
  malaria
    primate, 26
    relapse, 26

Identification
  automated systems, 302
Immunization
  oral, 328
  Salmonella spp. as carriers of foreign antigens, 328
Influenza viruses
  new aspects, 74

JC virus
  progressive multifocal leukoencephalopathy, 49

Letters
  aspergillosis
    antigen detection, 211
    invasive, 211
  L. monocytogenes CAMP reaction, 343
Listeria monocytogenes
  CAMP reaction
    letter, 343

Malaria
  hypnozoite, 26
  primate, 26
  relapse, 26
Malassezia spp.
  human infections, 101
Meningitis
  bacterial, 130
  laboratory diagnosis, 130
Mycobacterial diseases
  infrequently encountered, 1
  newly recognized, 1

Nucleic acid-based detection methods
  advances, 370

Peritonitis
  continuous ambulatory peritoneal dialysis, 36
  microbiological aspects, 36
Primary hepatocellular carcinoma
  hepatitis B virus infection, 275
Progressive multifocal leukoencephalopathy
  molecular biology, 49
  pathogenesis, 49

Salmonella spp.
  carriers of foreign antigens, 328
  immunization
    oral, 328
Strongyloidiasis
  dysregulation
    a new hypothesis, 345

Tetracyclines
  bacterial resistance
    clinical significance, 387
    mechanisms, 387
    transfer, 387
